

9、Cobalt coated spherical nickel hydroxide

Performance

Black spherical powder, with good processing performance, good conductivity and power performance, good stability and excellent circulation performance.

Use for

improve the conductivity of spherical nickel hydroxide and improve the utilization of active substances

It can be used to make Ni MH batteries with high capacity, long life, low self discharge and high power. At present, the production capacity has reached 500 tons / year.

Indicators:

Ni	Co	Zn	Ca	Mg	Cu	Fe	Pb	Mn
≥54	3-8	3-4	≤0.05	≤0.05	≤0.001	≤0.005	≤0.005	≤0.01
Cd	NO ₃ ⁻	water content	Apparent density	Tapped density	D50			
≤0.005	≤0.01	≤1.0	≥1.60	≥2.1	8-13 μm
